SUMMARY

Software Engineer with 4+ years of experience across IoT and Fintech, specializing in backend systems with TypeScript, Go, and Node.js on AWS cloud infrastructure. Proven track record architecting and delivering production-grade features — including a Stripe billing integration supporting 4,000+ global users — and driving measurable business outcomes. Comfortable working across the full service lifecycle, from system design to debugging customer-reported issues in production.

WORK EXPERIENCES

igloohome

- **Software Engineer at Igloo Company, Singapore**
November 2023 - present

An Internet of Things (IoT) company specializing in Smart Lock solutions, leveraging Go, TypeScript and MongoDB for scalable and efficient data storage.
